Dear Professor Höschl,

We would like to express to you our gratitude for your lecture about Bedřich Smetana: Art and Disease presented at the 26. Congress of the European Society for Paediatric Urology held in Prague between 14th and 17th of October 2015. Your lecture was very well taken and must have inspired the audience to contemplate over different aspects of life. It is admirable how openly you could talk about the disease and private life of a man who is one of the most famous and recognised artist, and create a true human being of the national icon.

We appreciate very much the professional and artistic experience that has pleased the congress participants from all over the world.

Yours faithfully
